### DETAILED ACTION

1. The following is an examiner's statement of reasons for allowance:
2. With regards to claim 2 and 83, the prior art of record fails to show or to suggest an optical imaging device that produces a tomographic image of an object having all the elements as presently claimed wherein the drive mechanism is operative to rotate said light-transmissive optical element on an axis of rotation, and said rotation causes light propagated along said incident light path to be deflected cyclically relative to said axis of rotation.
3. <sup>3-5, 7</sup> With regards to claims ~~3, 4, 7~~, and 84-87, the prior art of record fails to show or to suggest an optical imaging device that produces a tomographic image of an object having all the elements as presently claimed wherein the optical length variation unit further comprises
  - a spectrum dispersion element for spatially dispersing the spectrum of light entering along the incident light path;
  - a light introduction block for introducing light from said incident light path to said spectrum dispersion element;
  - a spectrum reuniting element optically coupled to light exiting said light-transmissive optical element for reuniting the angular frequency components of the spatially dispersed light which are phase-modulated by said light-transmissive optical element; and
  - a light pickup block for routing light emitted from said spectrum reuniting element to said emitted light path, and

the light-transmissive optical element being optically coupled to light exiting said spectrum dispersion element for substantially linearly modulating the phases of angular frequency components of the light dispersed by said spectrum dispersion element, and a gradient in the phases of the angular frequency components of light modulated by the movement of said light-transmissive optical element is changed with the passage of time.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
